

COMBINED LOCKS WATER UTILITY HYDRANT FLUSHING

The Combined Locks Water Department will begin semi-annual water main/hydrant flushing on Monday, September 21st, 2020. The flushing will continue through Friday, September 25th, 2020.

The water main flushing will remove most of the natural minerals, such as iron, that are harmless but will discolor water. If you see our Public Works Department personnel working in your area, use little, or if possible, no water for $\frac{1}{2}$ hour to $\frac{3}{4}$ of an hour to insure that water has “settled down” - so that the discoloration is not drawn into your water system. If you do find discoloration in your system, stop using water for about $\frac{1}{2}$ hour - then draw off the discolored water through the **cold water faucet only**. Our best advice is for you to wait until after 4:00p.m. before washing clothes to minimize potential discoloration.

Thank you for your cooperation.
